

Sil>Select Plus™

INTENDED USE AND COMPOSITION

Sil>Select Plus is a ready-to-use gradient system for semen preparation. The following gradients are available:

- Sil>Select Plus Upper layer (45%)
- Sil>Select Plus 80%
- Sil>Select Plus Lower layer (90%)

Sil>Select Plus gradients consist of silane-coated colloidal silica particles suspended in HEPES-buffered EBSS (Earle's balanced salt solution) supplemented with 0.4-2.2g/l human serum albumin (medicinal substance derived from human blood plasma). Some product codes are supplemented with 10mg/l gentamicin (medicinal substance). The Sil>Select Plus system can be used for semen preparation for Intra Uterine Insemination (IUI), In Vitro Fertilization (IVF) and Intra/Intracytoplasmatic Sperm Injection (ICSI).

For professional use only.

PRODUCT SPECIFICATIONS

• Store products without gentamicin between 2-25 °C. Once opened: store between 2-8 °C.

• Store products with gentamicin between 2-8 °C.

• The products can be used up to 7 days after opening when sterile conditions are maintained and the products are stored at 2-8 °C. Keep away from sunlight

• The devices need to be disposed in accordance with local regulations for disposal of medical devices.

STORAGE/DISPOSAL INSTRUCTIONS

• Store products without gentamicin between 2-25 °C. Once opened: store between 2-8 °C.

• Store products with gentamicin between 2-8 °C.

• The products can be used up to 7 days after opening when sterile conditions are maintained and the products are stored at 2-8 °C. Keep away from sunlight

• The devices need to be disposed in accordance with local regulations for disposal of medical devices.

PRECAUTIONS

• Aseptic technique should be used to avoid possible contamination, even when the products contain gentamicin.

• All liquid products should be treated as potentially infectious. Source material used to manufacture this product was tested and found non-reactive for HbsAg and negative for Anti-HIV-1/2, HBV, and HCV. Furthermore, source material has been tested for parvovirus B19 and found to be non-elevated. No known test methods can offer assurances that products derived from human blood will not transmit infectious agents.

• Standard measures to prevent infections resulting from the use of medicinal products prepared from human blood or plasma include selection of donors, screening of individual donations and plasma pools for specific markers of infection and the inclusion of effective manufacturing steps for the inactivation/removal of viruses. Despite this, when medicinal products prepared from human blood or plasma are administered, the possibility of transmitting infectious agents cannot be totally excluded. This also applies to unknown or emerging viruses and other pathogens. There are no reports of proven viruses transmissions with albumin manufactured to European Pharmacopeia specifications by established processes. Therefore handle all specimens as if capable of transmitting HIV or hepatitis.

• Always wear protective clothing when handling specimens.

• Any serious incident (as defined in European Medical Device Regulation 2017/745) that has occurred should be reported to FertiPro NV and, if applicable, to the competent authority of the EU Member State in which the user and/or patient is established.

• Use of Ph Eur or USP grade products if applicable

• A certificate of analysis and MSDS are available upon request or can be downloaded from our website (www.fertipro.com)

Sil>Select Plus Sperm Washing/Insemination medium:

• Chemical composition

• pH criterion: 7.20-7.90 (release criterion: 7.30-7.60)

• Osmolality: 270-310 mOsm/kg (Upper layer)

• 290-330 mOsm/kg (Lower layer)

• Density: 1.0500-1.0700 (Upper layer)

• 1.1050-1.1150 g/ml (Lower layer)

• Endotoxin test mit Limulus Amebocyte Lysate methodology (USP <85%): < 0.5EU/ml

• Sterility test according to the current Ph. Eur. 2.6.1/USP <71%: No growth

• Human sperm survival assay (% motility compared with control after 4 hours): ≥ 80%

• Human sperm survival assay (% motility compared with control after 24 hours): ≥ 75%

• Not MEA tested

• Use of Ph Eur or USP grade products if applicable

• A certificate of analysis and MSDS are available upon request or can be downloaded from our website (www.fertipro.com)
